

# CHRISTIAN JACKSON

Founder & CEO, Edapt  
Organizational Change Strategist | AI Systems Advisor

Helping institutions operationalize AI with clarity, strategy, and measurable outcomes.

## ABOUT

**Christian Jackson** is a creative technologist and educator who helps institutions **navigate AI adoption without losing sight of what matters most: critical thinking, organizational growth, and educational outcomes.** As Founder & CEO of Edapt, he has spoken to tens of thousands of leaders and partnered with hundreds of school districts, translating the bleeding edge of technology into practical, implementable strategy. His approach is rooted in deep listening and real-time problem solving. Where most AI conversations stop at excitement and chasing new trends, Christian **starts with institutional reality and builds forward.** If you are looking for an exhilarating peak into where the world is going and how to ensure your team does not get swept away in this next great disruption, Christian's message is for you.

## IMPACT AT A GLANCE

<b>20,000+</b> of leaders engaged	<b>100 +</b> of districts served	<b>National &amp; State</b> conference keynotes	<b>Real-Time</b> problem solving methods

## SIGNATURE SPEAKING THEMES

### Beyond the Shiny Object: AI That Moves Institutions Forward

This session cuts through the hype to focus on what drives real organizational change: listening to problems, building implementable solutions, and protecting the critical thinking that makes institutions effective. Leaders leave with a concrete framework for adoption grounded in their reality.

**For:** Superintendents, Executive Teams, Boards | **Outcome:** Clear AI implementation aligned to org priorities

### Protecting and Scaling Critical Thinking in an AI-Saturated World

AI can accelerate learning or erode the thinking that makes it meaningful. This session equips leaders to draw the line between where AI enhances human capacity and where it replaces it. Attendees gain practical guardrails that protect cognitive rigor while leveraging AI's strengths.

**For:** Educators, Governance Teams, Boards | **Outcome:** AI framework that strengthens, not replaces, reasoning

### Operationalizing AI Across Large Systems

Adopting AI is one thing. Operationalizing it across departments, workflows, and leadership tiers is another entirely. This session provides a systems-level blueprint for scaling AI responsibly, from strategic planning and compliance to daily operations.

**For:** Corporate Leadership, State Agencies | **Outcome:** Adoption roadmap with clear roles and accountability

### Building AI-Literate Leadership Teams

Leaders cannot govern what they do not understand. This session builds foundational AI literacy among decision-makers. Teams leave equipped to evaluate AI tools and lead adoption with confidence. Because they leave knowing how to use the tools.

**For:** Boards, C-Suite, Senior Leadership | **Outcome:** AI-literate leaders who govern tech strategically

## ABOUT EDAPT

Every large institution hits the same wall. Leaders spend hundreds of hours producing plans, reports, and documentation inside systems that don't talk to each other, restarting work every cycle, losing knowledge when people leave, and never learning from the data they already collect. They can't see clearly inside their own systems.

And when leaders can't see clearly, they can't share clearly. When they can't share clearly, they can't learn fast enough to improve. The system stays stuck. And the institution stays stuck not because leaders fall short, but because no one redesigned the infrastructure around how leadership actually works.

**Edapt** was built to solve this at the root. Through AI-powered tools, strategic advisory, and a proprietary leadership maturity framework deployed across hundreds of school districts, Christian and his team transform how organizations move from reactive, siloed decision-making to networked systems where insight flows across teams, departments, and regions. Compliance becomes shared intelligence. Reporting becomes learning. And leaders get back the time and clarity to actually lead.

**The long-term vision is ambitious and already underway: institutions that self-improve. Where every plan, every report, and every insight makes the next one better.** Education is where this work is being proven. The thinking behind it applies everywhere leadership, complexity, and systems intersect.

Most institutions know they need AI but lack the practical roadmap, internal literacy, and strategic framework to move forward without disruption. Every engagement with Edapt is rooted in Christian's signature methodology:

1. Listen deeply,
2. Diagnose clearly,
3. And build solutions teams can actually sustain.

## ENGAGEMENT FORMATS

<b>Keynote Address</b>	45-75 minutes. High-impact sessions for large audiences.
<b>Leadership Workshop</b>	Half-day or full-day. Hands-on sessions for executive teams.
<b>Governance Session</b>	Tailored for boards navigating AI policy and oversight.
<b>Strategy Retreat</b>	Deep-dive planning for senior leadership teams.
<b>Panel / Moderator</b>	Expert facilitation for conferences and summits.

*All sessions are tailored to the organization's goals, challenges, and leadership context.*

## NOTABLE SPEAKING ENGAGEMENTS

AASA (The National Superintendents' Association) • Small School District Association •  
Association of California School Administrators • National Rural Educators Association •  
West Virginia Association of School Administrators • North Dakota Council of Educational Leaders •  
Texas Association of School Administrators • California Association of School Business Officials • and more
